Some were worried that we might become adult with the time – Rest assured – we'll stay like we were!

End of February 2018. Since few days, it is an amazing winterwonderland in the north of Germany. It is pretty cold, even in the middle of the day, temperature remains under 0 degree. Thereby, it is sunny and no cloud darkening, neither the sky nor the state of mind. That's the perfect weather condition to check the heating capacity of the 2CV and also to test if an integrated winter protection does make a difference or not!

After few kilometers of drive, I decided to put on the winter protection – one gets older and thus much sensitive! I can finally enjoy this cozy, unhurried pace of the 2CV, reminding me of the early days, over 30 years ago, while I was still a young guy and had my first 2CV. It was a cheap one, mostly in a very bad condition at that time, but it was my freedom, the contrast to those conventional Mercedes, Opel or Ford, which were very common here in the region. And, very important, it was my taxi to the night club, bars, girlfriend's place.

I did my apprenticeship as a car mechanic at Mercedes and I was not even allowed to park the 2CV on the premises. At work, I had to wear a cap, because of my massive, upswept hairstyle with coloured black hair. All my friends drove old French vehicles or also some Mercedes funeral cars. This was the expression for rebellion against the traditional 1980's. Thus, a wonderful idea came into my mind. I decided to establish my own company, handling with spare parts for the 2CV, together with my former girlfriend.

One can surely earn his living like this! We were young, dynamic and fully enthusiasts, though unexperienced but wanted to do whatever we like to.

Well, it's been now 30 years ago! Full of enthusiasm and motivation, we started our little business in our flat, situated on the far-myard. It was a great feeling as far as business was running pretty good; however not for a long time! The friends switched from old to modern vehicles, built a house and became parents. And we? We were still driving our 2CV or an old Peugeot and Alfa. No house, no child, no money. Though working 65 hrs per week and a bunch of trouble.

„Falling down is part of life. Getting back up is living!“ We have chosen to stand up and go ahead. Today, business is running good and it's a pleasure working with the nice people here. Surely, there are moments, where one is slightly annoyed, but at the end of the day, we all laugh together and that's what matters. Maybe the school times in the 80's, the fact of being different, being rebellious, helped me facing particular circumstances in life and facilitated things as, one takes things easier and much relaxed. Nowadays, I take my time, driving the 2CV (ok, there are indeed, amongst others, DS, R4 or Peugeot and Alfa also on the waiting list). Moreover, I avoid as far as possible, all those digital technology and doing things for which I'm really interested in.

Back to the present times: In my memory, the heater of the 2CV was more efficient.

It's pretty cold here. Or am I really too old?
I therefore decided to drive back to the garage, while listening to „The Cure“. What a nice evening, though a bit cold.

Thanks to many people, I have been able to experience many situations, permitting me narrating today. That is also the positive aspect of getting old; the high esteem does not only rise, but one is also keen to express it in words.

I'd also like to express my sincere thanks to my employees, as without their involved cooperation, this would not have been possible. A big thank goes to my former girlfriend, actually my beloved wife, who allowed me doing what I wanted to. I thank her also for her precious advice, support and also for slowing me down occasionally, when necessary. And last but not least, I thank my parents for having letting me

doing what I assumed being necessary to be done.

Even though, it sounds like blowing my own trumpet, I'm proud of myself and my achievements. I'm glad that I have managed doing things according to my philosophy to life, without being conquered by all those obligations or digital world. Things can remain thus.

Let's look ahead all together, what is expecting us in the next 30 years.

Born in October 1983, I had the joy to experience children's games such as hide-and-seek, French skipping and outdoor afternoons during my childhood: great!

Of course, there was already one or other technical progress, such as the popular walkman at home. However, PCs, cell phones, the Internet or E-Mails were still beyond our imagination at that time.

My brother and I often spent our time collecting the manufacturers' addresses from the packaging backs of our favorite products and sent out postcards like mad to kindly ask for giveaways or other little somethings. With significant success!

For example, a well-known beverage giant offered us a music cassette with its advertising songs, a candy manufacturer its latest chocolate bars in a chic tasting box and a pet food producer a pack of provisions for our dog, my budgie & my brother's goldfish.

What a great feeling! We came home from school and discovered that something of what we had sent out "fluttered" back into the house...WOW! This got us very enthusiastic!

I had always been passionate about communication and means of communication. Also (and

especially) in the days of the typewriter. Thanks to my grandfather I was glad being able to count one model among my properties which helped us to optimise our writing office and to receive one or other small, yet impressive, little something at home. Through this, I did myself that favour of gaining initial impressions with regards to "SENDING & RECEIVING" / "ACTION & REACTION" and making this important experience early in my life (at the age of 6!).

Family members who, of course, remember my first years better than I do, keep saying, "She could talk even before she could walk.." (and I had NOT only started to walk at the age of 5! :-).

I haven't become "a real chatterbox", but this had aroused a profound interest in my life for my own and foreign languages.

So I took (almost) everything possible with regards to languages in my school career and gained - besides English - first impressions in the foreign languages French and Spanish. After graduation from high school in 2002 I spent six months in Ivory Coast (West Africa) where I could make progress in French and personally grow.

On my return in 2003, it was easy for me to decide upon an education as foreign language correspondent in Osnabrück (North Germany). Having successfully finished my education in 2005, I entered the business world.

After 12 years of professional experience in various fields, I am now part of a great team at "DER FRANZOSE / Cipere" (mainly treating the online orders) and I am glad to be in contact with vintage car enthusiasts all over the world allowing me to assist them receiving the corresponding parts so that their "beloved vintage babies" continue to run.

It all begins in the 70's and nothing predestinated me working for CiPeRe. I was a young boy, the fourth of 6 children and we were living in Amiens, in the town close to the cathedral. My parents replaced their beautiful DS by a VW estate car, which was much convenient. Though, our daily trip was done on foot as far as possible. Then, I had my bicycle permitting me moving further far away from our place. While following the tow path, I could even reach the confluence of La Somme and breathing the fresh air from Côte d'Opale. The daily journey to school was done by bicycle, in all weather conditions, whereas the flea market on week-ends were much more interesting.

My parents collect a lot and I learnt quite early that old things do not always have the same value. There are a lot of things which can be repaired. We can revitalize so many things after tinkering around with a bit. Through this success, one develops a sentimental relation with those objects. One day, my father bought an old Alcyon bicycle, a pre-war cycle. He restored it and the bicycle was useful again for the road. The advantage for two-wheeled as well as four-wheeled vehicles is that they make sense once they have gained their mobility. In contrast to vehicles in museum, even though I like visiting museums, they are all immobile, as if they are waiting for something. By the sight of those vehicles, caged in and far from the roads, it gives me a feeling of slight uneasiness.

After my studies in language and a job as technical translator, I got the opportunity to come back to Citroën Vintage Vehicle. It's fantastic the way things pan out as I started with the legendary DS. In 2008, I took a year off work to renovate my

house, which was still in its original condition, since 1920. I met Ansgar Olberding for the first time on a spare parts aftermarket in Rheinberg in Germany. He proposed me working for him, which I refused at first. I then met him again at the Techno Classica in Essen. After a nice talk, we decided to meet again in Vechta on the newly constructed premises of Der Franzose. At the beginning, my task was only to translate the lists of existing spare parts and the German catalogues. It was in fact, a simple task which I could easily manage from my place. Thereupon, we came to the idea of developing a sales business to the francophone countries.

Today, I move in my 2CV Dolly or ride my Solex bike but I still do a lot of trips on foot or on bicycle together with my kids. They also learn that mobility is indeed a freedom. And when we walk around on the flea market, we often find some valuable antique, which we get reanimated after some few craftings. If, in 20 years, the children can still drive a vintage vehicle, they will remember that sometimes even the mechanic has a beating heart, giving us that feeling of freedom.

Order picker

30 years ago, at that time, I just celebrated my 20th birthday and put an end to my 2CV's time.

The engines with a higher horsepower were more interesting, particularly the motorcycles. However, my passion for the 2CV has never really ends. And every time I see a 2CV on the road, it brings up a smile to my face.

A couple of years later, I saw an announcement that „Der Franzose“ was recruiting people for the office. Considering my re-education and advanced training as office clerk, I thought that this will be a good deal for my future career, after years of experience as assistant pharmacist. So, I sent my job application.

Few weeks later, here I am, the first employee of the company „Der Franzose“. Almost one year later, we moved within Vechta. The company grew and the number of employees rose and still do till this day.

Meanwhile, I changed from the office to the warehouse. Now, I'm here since mostly 15 years, working as order picker at the warehouse. I pick up all parts which our customers ordered, which will then be carefully packed and prepared for shipping.

Today, I'm still busy picking up the orders here and I enjoy it. I'll definitely stay at „Der Franzose“ for coming years.

We are a great team and that's very important!

Incoming goods department

1988 – my last school year! In general, one shall know what one wants to do after school. However, I can remember that I did not have any idea of what I really want to do later on in the business world: Graphic designer, or police officer or maybe car mechanic?? One thing was for sure, never ever mason!

Til I received a broad hint from the automotive history. It was THE appearance of the year... Only by hearing its name, makes my heart beats faster. Unfortunately, since 1988 up to now, I haven't managed having my own Ferrari F40. But as my parents told me earlier: „Hard work pays off!“

Well, school wasn't cool; learning and those homeworks and so on...

And finally, school comes to an end! As I had decided not to follow the advice of my parents, I began an apprenticeship as car mechanic. With a heavy heart, I swapped from Ferrari to Opel! I became familiar to various types of oil as during the first year of my apprenticeship, I did not know much so I had to repeat doing that task again and again: oil change, car wash etc.. and when I was lucky enough, I had the honour to polish the vehicle fleet of the boss (Opel Kadett A, Manta A, GT or his Rekord P1). Yes, even Opel had beautiful vintage series. Even though I was fascinated by those vehicles, I had this weird feeling during the apprenticeship that this profession was not really my cup of tea. But anyway, I had to grit my teeth to complete at least the apprenticeship. After my apprenticeship, I did not really have

much time to think about what I could do. The German Army meant that they absolutely needed me so I had to join the army in 1991 for one year. I completed my basic military service and have been relocated to the supplier unit. I learnt how to work on computer and deal with incoming of „goods“ and further material which were required. After my military service in 1992, I started working in the warehouse of a car dealer, where I did my apprenticeship. In 1999, I moved from Opel to Volkswagen. Thereupon, I changed to Ford for a short period in the production afterwards in 2013 in the warehouse.

Since May 2017, I've been working for Der Franzose, operating in the incoming goods department and I'm happy to be here. Back to the roots, even though a 2CV is not a VW Golf 7! I must admit that those old treasures do have a „real heart“, no peeps here and there or control devices but a mechanical pump, adjustable ignition contact, old carburetor...really old school and I like it and looking forward to many more years working for „Der Franzose“ in Vechta.

My best wishes to Der Franzose on its 30th Anniversary.

Hej hej, I'm Anna from Sweden.

As I started working for Der Franzose, I must admit, I knew only the few essential things about a vehicle. Earlier, I've been working in the hotel and gastronomy sector. Then, I got the opportunity for a new start.

Amazing, how beautiful those French vintage cars are. They all got something special. Thanks to Der Franzose, I have discovered another facet of myself.

In addition to that, I feel myself comfortable working here, whatever the department. 2 years ago, I started here at the incoming goods department which was really good, thus I could see all spare parts, allowing me getting a better overview. I afterwards moved to the warehouse as order picker and could distinguish few parts once more. Nowadays, I am at the sales department and I'm happy to assist our very friendly customers as far as I can. However, I must say, I'm very delighted when I have the opportunity to assist customers from my homeland.

Hi!

In the beginning of the 80's as I wanted to get into the business world, I could have got various apprenticeships. However, I wanted to become a car mechanic even though this was the worst paid job. Unfortunately, the training company went bankrupt 5 years later and thus, I only restored vehicles for private purposes. After a 2 year journey in Canada, I worked for a short period at the scrap yard and then in the metal-working industry. After a few years break, due to an accident, here I am again back to the car mechanic world. Luckily, my apprenticeship was from the 80's so, the base is still in mind, comparing to those, operating with modern technology, using notebooks to get a diagnostic. On the other hand, if I have to identify the mechanic problem via notebook, I'll definitely fail.

I indeed kept my interest in vehicles as I had earlier, three Manta A, an Opel GT as well as two Mustangs. We also had an AK 400 and I restored also an R4. My father even had a Citroën DS. All this culminated then into a job as mechanic at a speedboat-racing team. The technique is mostly similar.

My job here by Der Franzose, does not only consist of sale via telephone but also sale in our small boutique. It makes things much interesting then, as I served customers from each corner of the world, who used the opportunity to come and visit our shop while they are in Germany. We do not only sell the spare parts but we figuratively adapted this life-style. It seems that I have found my dream job. After all, I've grown up with the vehicles. Recently, I even planted some lavenders even though, I normally only cut the grass. I simply like the french style – c'est la vieor something similar. Let's have a Cidre on it. Santé!

30 Years Franzose

Those who've attended once our „Franzose-Treffen“, have surely noticed the yellow Citroën DS. It was mine, which I unfortunately had to put on sale due to lack of time. You know how it is: A car is only of value, when it runs... and I did not know much about cars, but

My first contact with a car? It was in 1972.

We lived in a small village. Our father had an electronic enterprise and the company car was the famous Renault R4. As I was only 11 years old, I had the opportunity to drive it as far as I stayed only in the courtyard. Til that particular day came, where I missed the brakes pedal and crashed into the huge plum tree... I was more or less ok, the tree was still there too... but the R4-Ouch!!!

I felt so ashamed but got to inform my parents about my misadventure. They immediately informed my favourite uncle Aloys (former car mechanic and was at that time a driving instructor) about my „talent“ and asked him to repair the car, of course mostly for peanuts. It was definitely not a simple task for him neither but he managed it indeed. What a disgrace for me. I was so embarrassed that I avoided him until my 20th birthday. (By the way, my uncle appears every year in our catalogues – You'll surely find him.)

My father was quasi the "MacGyver" among the electricians. With only three parts, he managed converting them into a superb tool within few minutes. I unfortunately did not inherit this skill from him, but my brother and boss Ansgar rather. My passion was and is still music. I'm DJ since more than 40 years and I'll definitely be doing this for further years. I have made a career out of my hobby and was for couple of years quite successful in the music industry. However, through the digital development, CD burner and various download platforms, the demand of CD's decreased abruptly. Thus, business was not working good and I had to abandon this occupation. The only thing which remained was my music label www.chance-music.de

I moved back to my home town, Vechta. I felt at home here. I imagined myself already earning my living as DJ in retirement home. However, things turned up differently. In summer 2004, I got a call

from my brother, who proposed me a job at „Der Franzose“.

No need to hesitate for long. But only subject to the condition that I worked for three days so that I can still work as DJ on week-ends. My brother showed me my new tasks – Internet and catalogues.

At that time, production of catalogues was a quite complex process. Nowadays, Thanks to the technology, things are easier. I even have a software, specially for production of catalogues. Thus, mostly 80% of the job is being done by the „machine“, compared to former times, where I had to create each single page. Even our website changed a lot though at first sight, it looks the same but the technique at the background is up-to-date. Our target for this year 2018 is a new redesigned website. It is easier said than done but we'll do, as usual our best. Since then, there has been a rapid evolution at Der Franzose. The newly built hall seems to be too small. We need a second one, followed by indeed, a third one built within a short time. Formerly, we were only 5 employees. The team of „Der Franzose“ actually consists of 30 employees. I've become a passionate „Franzose“ and I simply love my job – though as the only „ignorant“ among all the specialists here.

Der Franzose will be celebrating its 30th anniversary!

If one has ever asked me, if I could imagine some when, selling spare parts for French vintage cars, my spontaneous response will be „how does it look like, that French vintage??“ The existence of those vehicles, was for me at that time, beyond my knowledge.

May I introduce myself? I, Neeroosha Sieverding, alias Neeroosha Pynee (I opted for a German surname later on .. for a better pronunciation – JOKE), born and grown up on a paradise Island, Mauritius!

As I moved to Germany, years ago, I did not really know much about cars. I remember that dad had a Peugeot, which one exactly?? No idea. Whatever! The main souvenir I kept about that car is that we mostly pushed than drove it. Not funny at all, while dad remained behind the wheel, the girls (Mum, my sister and I) were pushing and it felt like moving a sleeping bison on a field. That's what I call Woman-Power. That was my first impression of French cars; Keep it, so push it!

Meanwhile, things changed a lot. I left my „little Mauritius“ and moved to good old Germany, in a small town called Buxtehude (the German will say mostly - middle of nowhere even though it is close to the beautiful Hamburg). In 2012, I moved to Vechta and since then, I'm working for Der Franzose, busy selling spare parts for French Vintage cars. Guess what, I still enjoy it... considering the fact that travelling around the world and exploring new destinations for customers is not boring neither (I was working in the tourism industry for 14 years).

It's a pleasure assisting our customers across the whole globus. Thus, I still make use of my knowledge in foreign languages and I learn so much about vintage cars as well as the spirit and lifestyle of enthusiastic vintage collectors.

It is never boring here and I like doing what I'm doing. That's what really matters.

How time flies! It's being almost 5 years since I'm a member of the „Franzose-Family“!

At that time as I noticed the vacancies in the newspapers, I was sure that this was exactly what I was looking for, operating worldwide and yet familiar.

Through my apprenticeship as assistant tax officer as well as my stay for several months in Great Britain and my experience as flight attendant, I was lucky that I did suit the required profile which Ansgar and Steffi were expecting. So in August 2012, I applied for a part-time job in the accounts department.

Thenceforth, there have been some years which passed by in which I received lot of supports, even in times of difficult circumstances. And, I'd like to express my thanks to the management for their understanding as it is not a matter of course!

Actually, besides my tasks here in the accounts department, I'm doing an advanced education in business administration, thus assisting as well in other tasks, like human resource, also on and off, taking some orders.

Since, it is always nice hearing that little things like a screw or a trim can make people happy.

30 Years "Der Franzose" – Pretty long way. Three decades ago, I finished my apprenticeship in the gastronomy. In 2008, I began working for Der Franzose at the shipping department and I'm still here today. It is a pleasure working here. My main tasks are picking up the orders and packing the parts. At the beginning, I did not know much about cars. I could barely recognise a 2CV. Even though if nowadays, I still do not know much about cars, but at least I know which vehicle is a french vintage and can even differentiate them. Yet, I manage to pack all spare parts, in other words a whole car but in a disassembled condition. Nevertheless, I must admit that packing some particular parts is indeed a challenge. Thereupon, I'd like to express my congratulations to Steffi and Ansgar for the 30th anniversary of „Der Franzose“ - and further successful years to come!

As I was 20 years old, (feels like as if it was yesterday, though it's been 30 years ago), I would have never ever imagined me, working in the automotive branch, particularly selling 2CV parts. I have done an apprenticeship in technical drawing, however I did not continue on this path. My very first car was indeed a 2CV special, turquoise blue. Yet, it was not my last 2CV. I had further two, which were very well maintained and had some particular accessories, like a head rest, catalysator and much more. At that time, the 2CV was rather a mean of transport than a collection object compared to nowadays, Thus, one could afford it.

Today, I use my bicycle to go to work and sell some nice parts to lovely customers. If one asks me the reason why I'm working for CIPERE, I'll answer ironically: „ I work here just to be able to go to work by bicycle, whatever the weather conditions.“

Seriouly, during a training, as I have been asked to describe in few words our customers, the only reply which I could give was: „Our customers are wonderful people.“ And that is my motivation. During my job interview, my boss welcomed me while mentioning: „ No-one needs the things which I sell here, yet there is a large demand!“ My dream job would be florist but the coincidence wanted that I sell spare parts.

Well, I'm here since 7 years already and I'm happy to be here. Not because of the parts but mainly because of the people, whom I'm pleased to assist daily.

LEO and his French Ladies

Real love that
never ends!

I was there.

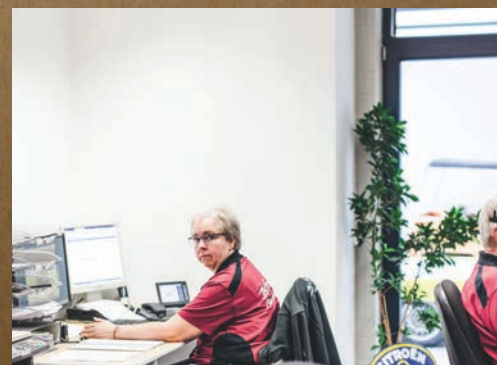

We are celebrating the 30th Anniversary of „Der Franzose“ this year. I would say - An astonishing long time for I have co-founded the company. As a business administrator, specialised in colors & wallpaper sector, I spent most of my leisure time with vintage vehicles. My boyfriend bought an Alfa Romeo in the 80's and without much discussion, it came to my possession, even my most cherished one. I drove a lot along in it as it was my very first car and thus a special bond with the Alfa.

Incoming of goods, shipping, sale, accounting and after-sales service etc... Days were very often too short to manage doing everything. Though, we had loads to do and incredibly stressful days, we had fun. Nowadays, things changed slightly: we still have lots to do, normal „stressful“ days and still having fun. We simply like doing what we are doing...except of the paperwork and all the bureaucracy!

Since some few years, I'm recovering the time I have invested and I actually work only on a part-time basis, particularly in the field suppliers accounting, Human Resources and Management. In my leisure time, I can finally live MY life, doing the common household, gardening, going for a walk with our dog, cuddling with the cat, reading books (the real printed version) and having a ride here and there in a vintage vehicle, (depending on the weather) with my hubby! Cars still mean a lot to me, they all are mostly family members... but yet, no more the most important in life!

A small ride
is always welcome...!

We ensure that
your car is being maintained
for a longer time!

What we do for you

Oil - Now, it's gonna be greasily complicated...

Most people think that oil change is very simple - buying the oil at the filling station and fill it??

It sounds very easy but for vintage vehicles, the modern oil is not really the optimal one for the motor. The new modern oil are thin fluid and contain much more cleaning additives which can ruin your motor.

Nowadays, the interval of oil change in modern cars with 50,000 km, is not an unusual condition. The modern oil has to be very thin to avoid that the filtration run smoothly, preventing sludge deposits and suits also vehicles with short distances. Whereas for vintage cars, oil change is done most of the time at specific season of the year! Oil is being renewed few weeks before the „hibernation“!

Vehicles like H-Van, Traction Avant, 2CV (until 2CV4) as well as many other vintage cars do not even have an oil filter. The impurities are set down in the oil pan and is being flushed out at the next oil change. That's exactly how it shall work! With the modern oil, it is the contrary which happens. The oil dissolved the impurities and pumped it again in the oil circulation. And this is wrong! Moreover, the material of the motor gasket of our vintage does not tolerate the chemical additives in the modern oil. Oil seals and rubber seal get harder through the additives and do not seal up correctly. Cork seal get eroded and does not absorb any oil anymore and thus the motor leaks.

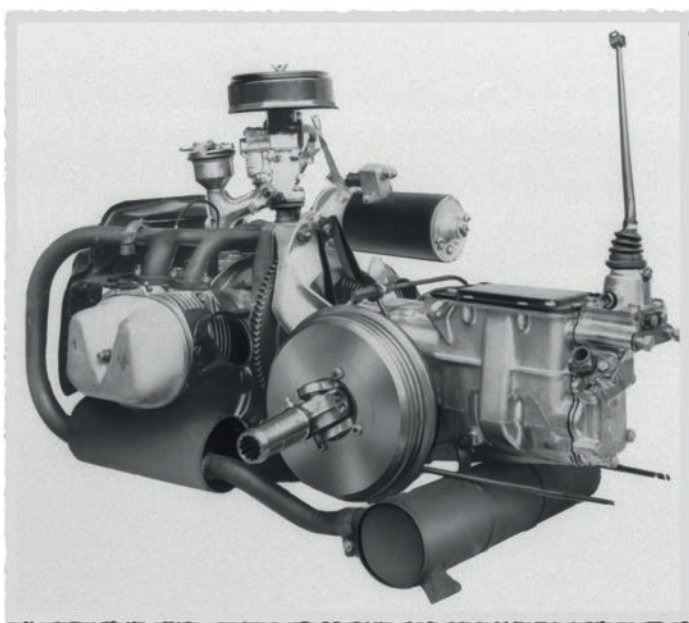

Just imagine, you take a plate full of noodle. On the lower part of the plate, you have 3 holes, pour some good olive oil upon the noodle. You can see how the noodle absorb that oil and underneath the plate, there is no trace of oil.

Now pour some soft drinks on the noodle. A pure chemical drink... now you can see that the soft drink does not get stick to the noodle and even wash out the good oil and the whole fluid are to be found on the plate and drop out slowly through the small holes in the plate!

Dear friends of vintage cars, this example with the noodle and the oil, is in fact a figurative one showing you what happens with your motor when you are using the modern high-tech synthetic oil.

So please hands off from all those modern synthetic oil.

Last but not least - our tip: the optimal oil for Citroen 2CV, DS, Traction und H-Van is 20W50. Even Renault R4, R5, R16, all rear-mounted engines (except Alpine) and all Peugeot like 203, 404, 204, 304, 404 und 504 are „grateful“ if the motor is being filled with 20W50!

Engine for Citroën 2CV6, in the exchange. Without contact box! Inclusive new oil filler neck, seal oil filler neck, 5 liters engine oil 20W50. 1x substitute oil filter. Engine: please fill oil up and adjust the valves. Plus old part deposit: 400 Euro. Caution: Please send old part without motor oil inside. Old parts containing oil cannot be taken back! (protection of the environment)

Used part deposit, what's that?

A lot of spare parts are no longer completely new fabricated. So special companies take back used parts to disassemble them. This single parts are going to be cleaned and lacquered, all flexible parts and pistons going to be renewed. After assemble them again, the parts are as good as new again.

However, we don't have so much used parts as we need and that is why we work with "used part deposit".

For example: A distributor sends us a renewed brake calliper. Excepting the base price, we have to pay 50 Euro used part deposit for this part. If we send back a suitable brake calliper, the distributor repays the 50 Euro.

We are also using this method: If you buy a spare part which is afflicted with used part deposit, you have to pay the selling price and the deposit. By sending back the replaced old part, you'll get back the deposit (just if the old part is qualified for an overhauling).

Engine oil

Engine oil is very important for the engine. However the best oil is not also the best for your car. Especially in vintage cars other seals and fittings are obstructed. Modern engine oil (synthetic oils) implies a lot of cleaning additions and they can destroy the seals. Furthermore, these engines oils have a low viscosity, so the oil fog cannot cling to the bearing shells.

That means, every time you start the car, the engine runs a short time without oil.

So always use normal oil or even better, use special vintage car oil.

It's better for the engine to change the oil more often instead of using high-tech oils.

Oil Pressure

After a winter break please pull the plus cable out of the ignition coil .

Then let the engine turn a little while until it build up oil pressure (the oil pressure light disappears). Only now start the engine, your car will be grateful for this.

Oil cans set out of sheet metal (3 item). Color: green. Holding capacity: 1/2 pint (0.28 liters). 1 pint (0.5683 liters), 2 pint (1.13 liters).

Ethanol fuel

new technology, new problem!

Ethanol fuel: new technology, new problem!

We are all delighted with the new achievements via the modern technology. However with the introduction of the E10 blend, much more trouble are being caused. The bio-ethanol fuel mixture is a highly concentrated dissolver which might cause some leakage issues to your engine, specially the seals and the fuel pipes. The ethanol causes serious corrosion. Moreover, recent engines have a sealed fuel system in contrast to vintage cars which have a good bleeding fuel system. This additional corrosion arises in the bleeding fuel system as ethanol is hygroscopic i.e it attracts moisture particles from the air. Simultaneously, this trouble is intensified through the acetic and formic acid which are being emerged by ageing fuel, specially for long service life vehicles.

Before the introduction of the catalyst, the additives in particular phosphate avoid causing corrosion. However as the phosphate also damaged the pollutant filter, this has thus been replaced by other resources. Nevertheless, through the continuing development in the automotive industry, those additives are no more to be found in fuel. Unleaded fuel from the 90s contained much more anticorrosive coating as fuel from nowadays.

Through the oxygen influence, E5 and E10 fuel are no more stable and decompose after few months. The stabilized additives are then inefficient. Many manufacturers can no more guarantee a durability of 60 days. After this period, the fuel starts to decompose and has a bad smell.

We then have to handle this corrosion issue ourselves. But how shall we manage it, when ethanol is being included everywhere?

The best solution to avoid further corrosion is to keep the tank full. After a long winter break, it is important to empty the tank as well as the fuel pump and the carburetor. Please do yourself a favour, use only fuel without bio-ethanol.

Based on our knowledge, only Aral (ultimate 102 octane) and Shell (V-Power 100 octane) can guarantee that those fuel are not being mixed with bio-ethanol.

Since three years, we are ourselves experimenting with the Liqui Molly petrol-stabilisator which is ideal for vehicles with low annual mileage and which can also be used after a winter break. When immobilizing your vehicle, please fill in the required petrol-stabilisator quantity into the fuel tank and let the engine run during 10 minutes. We only get good feedback about that indeed without guarantee. Anyway, we can only recommend it to you.

A helpful hint for you guys: we also use the good petrol for our own engines which we rarely used, like lawnmowers, chain saw, tractor etc... and amazingly, we can start the engine immediately even after a long winter break!

No need to save for a full tank to get higher expenses later on!

Citroen 2CV6

Dyane 6, Mehari

Made by Franzose®

NEW!

Belt pulley (fan blade + V-belt), better than original (Made by Franzose). Suitable for Citroen 2CV6, Dyane, Mehari. The belt pulley has been rotated from a 18kg steel block DIN 1,0501 (AISI/SAE 1040, EN C35). Fine balanced pulley, thus avoiding much pressure on the crankshaft. No risk of tearing off as it is not welded. Belt pulley is yellow galvanised (like original). Made by Franzose/Cipere, entire production process in Europe.

NEW!

Carburettor oval (new part), for Citroen 2CV6, Solex 26/35. All carburetors are disassembled by us, and the float level (float gauge) is adjusted. The carburetor is then mounted on a 2CV 6 engine and subjected to a test run. We then adjust the carburetor completely according to Citroen specifications. The carburetor is therefore ready for installation and requires only a minimum of adjustment to your engine. The workload of around 1.5 hours is already included in the sales price.

12 Volt

Electronic ignition system 12 Volt, for Citroen 2CV6. This ignition system is designed for all 2CV's (and derivatives) with a A79/1, M28 or M28/1 engine. It is a microprocessor controlled device, that replaces all the mechanical parts of the conventional system, like points, cam, and centrifugal weights. The system is designed for the stock (black!) coil, and is intended for 12 Volt systems only. The ease of installation, and the outstanding quality has attracted thousands of happy 2CV-drivers, all over the world. The main benefits are : better starting, better fuel consumption, smoother running, better emissions, more torque (especially in the lower rev's), no maintenance, EVER again

Ignition 123UNI is designed for all STANDARD 2CV engines that were ever produced. The appropriate advance-curve can be selected with a 16 position rotary-switch, behind an opening in the front of the housing. The unit will work on 6 Volt and on 12 Volt systems. The '123\UNI' is designed to work on '2CV' 9 hp, 375cc, A53, M4, A79/0, M28, A79/1 and M28/1 engines in conjunction with the stock black coil. (6 Volt type for 6 Volt battery, and 12 Volt type for 12 Volt battery) The dwell is automatically adjusted. Upon installation, the user has to check his engine plate ("A", "AZ", "AM", "AYA", "AM2", "AYA2", "AK2", "A06/635", "A06/642", "AM2A" or "A06/664") and look in the manual which setting of the rotary-switch is appropriate. There also is a special setting for M28/1-engines running on LPG or on Ethanol, like 'E85' as used in Sweden. ('E85' contains 85 percent ethanol, and 15 percent standard fuel)

0208 ignition

Ignition coil special kit for 2CV. High-performance ignition coil, special for 2CV. This high-performance ignition coil "made by Franzose" is the solution to the well known problem of defective 2 cv ignition coil. No more bucking! No need anymore to have on bord an ignition coil for replacement! This high-performance ignition coil works in combination with electronic ignition (14300) as well as with ignition contacts warranting in both cases a reliable operating. A further advantage of this high-performance ignition coil is a much better start. This high-performance ignition coil has by 10 volts the same output as the normal ignition coil by 14 volts- This enables a much better start. When starting vehicle electrical system voltage decreases till approx.9-10 volts. At this level the high-performance ignition coil is already highly efficient. Because there is no high-resistance oil anymore between the primary wave and the secondary wave and thanks to safe plastic used this high-performance ignition coil has a long life expectancy. Content: mounting bracket, 2x ignition cable, 2x NGK ignition plug. CAUTION:our ignition coil is only compatible with our electronic ignition systems (items n°14300 + 14325). Other electronic ignition systems work with a different resistance what can destroy the ignition coil!

Original rim

exclusively available in our store

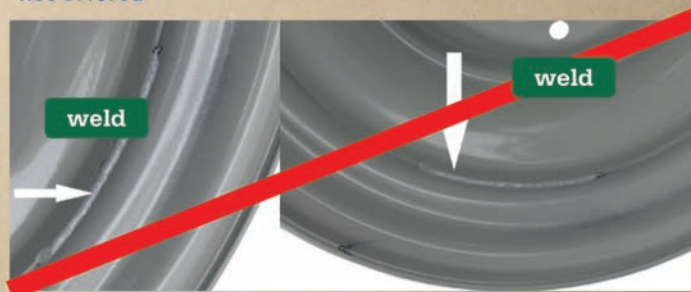

Rim 4Jx15 for 2CV (tubeless), original size.
CAUTION: Citroën stopped the rim production. We let produce the rim in the same original quality. Our rim is identically the same as the original rim as far as all production parameters are concerned: material quality, size and surface treatment. Perfect original equipment manufacturer quality! These high quality rims can only be bought from us. What is an original rim? Our rim is produced in the same factory, on the same machine, with the same material, and exactly according to the same production process as the Citroën rim has been produced in the past. The only difference is that our Company is the current purchaser, not Citroën anymore! That is why our rim is officially approved. A wheel is composed of two parts: the rim and the wheel disc. The rim is built up of butt-welded rolled metal strips. After the roll stand operation which usually consists in 2 roll operation steps the wheel disc gets pressed into the rim. This production method called "press fit" enables fixing for sealing operation by spot-welding. Finally the whole wheel is getting coated (through cathodic immersion bath) for anti-corrosive protection. The front side of the rim is varnished in grey beige color. This varnish is just a protection against ultraviolet radiations or weather conditions. For an optimal optics, the rims should be painted again. Other available rims on the market are reproductions which are not produced in the same method as our original rim. They are just welded (visible welding points). Only the costly press fit production process of our rim offers an optimal stability and safety to this essential spare part which is actually the only connection to the road. The rim is for tubeless operation, but you can drive it also with inner-hose!

Je t'aime Citroën, Peugeot, Renault,

Dear „Franzosen“ fans, such is life:

I'm sitting peacefully in my garage, my DS is in my back, the Peugeot 204 Cabrio on the lifting ramp, is longing for an oil change. Contrary to the weather forecast, the sun is shining....actually it is great but on the other side, I have to help in the garden, sweeping all the leaves outside!

In that moment, I see my wife and the dog coming in. I'm suspecting something bad... instruction for the gardening?!

I switch off the music as in that moment I could noticed some tears running down her eyes. She has toothache! I take her in my arm and whisper to her „darling, don't worry about that. Come in and take a seat. I'll get this sorted out.“ I tie her with some cable straps on the chair and turn on „AC/DC“ quite loud. Using a rubber mallet, I hit her on her head and she fainted! First step - checked!

Using a mole grip, I fix her mouth to be kept opened for me to have a better view on this dilemma. Alright... overthere on the left side completely at the back, that does not look good at all. I have to get this evildoer out of her mouth. I need some tools - precision mechanics, small drilling machine, pointed pliers and the good scalpel which I used to cut the DS carpet.

While drilling in that tooth, I slip and hurt the gingival...OMG! I grab the suction gun and absorb the bleeding point. I notice that through this operation, I have not only hurt her palate but I hit the wrong tooth.

Anyway, that bad tooth has to be removed. I grab to the universal pliers...it goes on amazingly quite smoothly with that tool after having cleaned up all the anti-friction bearing grease. And here it is!

Actually, while pulling the tooth out, I hurt myself. If I was well prepared, I would have put on my gloves. I, suddenly hear my wife breathing stertorously.... MY goodness, she is awake! I didn't even notice it.

Anyway, she can't speak because of the mole grip and can't make any moves neither. Thank the cable straps, she was firmly tied . As I was not really finished with the operation, I hit her again with the rubber mallet on the head. Now I can release her and clean both wound, mine as well as hers with the good brake cleaner...

Dear friends, you might now think, what a creepy story or may be wondering yourselves if I have had too much whiskey oder too much grog! No guys, there is a reason why I am telling you this nonsense.

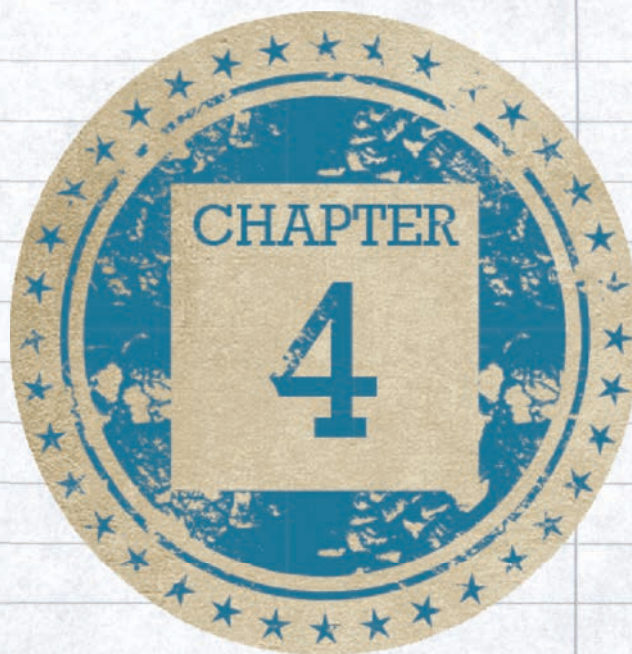

No one will in fact trust himself doing this kind of operation, specially with his wife... Why do we then have dentist?!

The moral of my fascinating story, is that there are people out there who have studied and are specialised in different fields. So why not letting the specialists doing their job and we are asured that our lovely is in good hands instead of doing ourselves any experiment on our favourite piece of chocolate.

Apropos chocolate, my wife is doing well. She just came from her appointment at the dentist and just informed me that we will have coffee and a nice chocolate pie later than usual as she can't chew for the next 2 hours!

Voilà dear friends, life is so beautiful. Let us enjoy it. Cheers, au revoir and best wishes.

Body new! Suitable for Citroen 2CV6 RHD (right hand drive). Only collection, no dispatch possible. The body was built completely from new parts. The quality of the body is good, however small remachining is necessary. So some spotwelds must be regind and the transition to the windshield frame should be tinned. The raw sheet metals (before the processing and shaping) are galvanized. New: Attached to the car body, there are some pictures attesting the correct fit since the body has been mounted on a trial basis with original sheet metal components.

A lifetime experience by Ansgar Olberding

Arctic Explorer on 21 hp

A promise is a promise! I learnt this since years and I always do my best to keep my promises. Just like the motto "A man's gotta do what a man's gotta do". It sounds quite like a macho talk, right? Anyway, I'm writing this, as a few years ago when I was 30 years old, I promised myself: When you'll be 50 years old, at the latest, you should have explored the Arctic in a vintage vehicle!

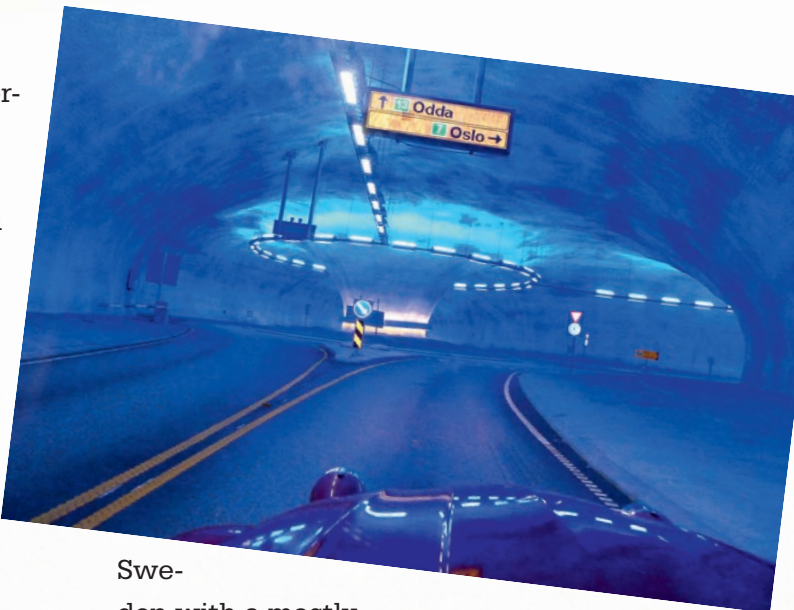

It was good that I made this promise early enough thus I had some years time to postpone this voyage to the next year. Such were things for years! I did postpone it to the next year and again to the year after. While time passed by and I kept on postponing the trip, I noticed that in two years, I would turn 50 yrs old. So, I needed to start the plans for the super trip!

You surely know how that happens! Each time you plan to do something, there is always a situation popping up suddenly, avoiding you to do things as scheduled. I'm still young in my mind so I thought that I could easily do this trip in a caravan or something similar.

As luck would have it, few days later I saw an H-Van for sale. It could be just a fortunate coincidence as if someone wanted things to be accomplished. I did not hesitate for long. I bought the H-Van, maintained it and prepared it for the exploring tour. That was the easiest part!...the most difficult one was to convince my dearest wife to accompany me on this tour in such condition. I had to bring forward all arguments that the H-Van is the ONE & ONLY appropriate vehicle for the Arctic. We could make a break whenever we wish to and overnight in the van anywhere we want to.

My wife knows me for decades and tolerates often lots of my bugs but as I narrated her my project, her prompt reply was just "NO! We are no more 30 yrs old and I'm not keen to spend nights in a camping vehicle!"

After all, she was absolutely right. Taking into consideration the status of my spinal disc, I should say that it would not be the right decision. At that moment, I saw all my projects and dreams getting evaporated into Nirvana. And suddenly, she came back with the wonderful idea, "Why don't we take the 2CV and at each stage of the route, we could stay overnight in hotels?" I was just about to give her a big kiss when I imagined this route in a 21hp 2CV??!! Mountains and 3000km? Two adults and some luggage on it? Sounds very brave. I would have never come to this idea, specially for that region... but anyway why not. I better not say anything about my concerns otherwise she might change her mind quickly. I've been once in Norway so I know how the streets are over there. My wife has only been in Sweden up to now, so I knew what she did not know!

Sweden with a mostly flat landscape and sometimes somehow some few hills whilst Norway, the contrary... predominantly hills, or I would say mountains with very very few flat landscape! The coming weeks, I was busy organising our route, looking for hotels, booking the ferry and all particular arrangements. I would have loved to do this trip during summertime. But in summer, it is our main season at work in July/August. Autumn in that region can be quite rude at this latitude.

So we decided to travel at the end of spring provided that we are back home latest on the 10th of June for the opening of the Eu-

ropean Soccer Championship. My wife insisted on it. I'm not kidding, guys... Seriously, she does not joke around when it 's about soccer!

A brief summary of our trip -

Vehicle: 2CV (rouge Rio) with 21hp. Year of construction: 1973.

Itinerary: Driving up to Kiel in Germany, ferry to Oslo and from Oslo up to the Arctic cycle by car and from there up to the Lofoten islands and further to Bergen with the Hurtigruten vessel. Return trip: drive from Bergen to Oslo and back to Kiel via ferry.

Then back home at the latest early in the evening.

I don't know how you do it when you are on holidays. As far as we are concerned, we stick to the rules exactly like I propose it. I don't know how my wife managed it but she indeed took only the strict minimum stuff paying attention to the luggage weight to avoid pushing the car up the steep slope. Wow, I will say "Chapeau, Mrs. Right!,, while considering all the stuff which I used to drag with, in other circumstances.

Before our departure, I made a servicing on the vehicle, fitted new tyres, of course the Michelin ones, and packed as well some few spare parts (only the essential ones) and some toolings (just in case of) which suit very well in the spare wheel recess.

And here we are! We can finally start! If you are actually thinking about what a poor guy, longing for some calmness and a time lag from all the modern digital world and so on, you are absolutely wrong. No, nothing like this. Actually, I was and I am still an old-school guy. At home, we neither

have

an internet con-

nection nor use our mobile phone, why shall we? We live in the middle of a plain forest far way from the city with such a poor mobile network. So, we are daily cut from the rest of the world as soon as we reach home.

In fact, our intention for this trip is that we only felt like doing something crazy! And, off we go: 300km up to Kiel. As I knew that we would have a tough drive up in the Arctic, so I thought to myself the drive to Kiel will be easy going, driving comfortably behind the trucks, remaining in the leeward side, just like the cyclists riding in the peloton at Tour de France. What an illusion! Thanks to the wind, the luggage and my spare parts, I can hardly drive up to 85km/h, thus even the trucks were faster than us. The truck drivers were surely thinking that I might have missed the rural road and got on the motorway by mistake. Anyway, who cares? I'm on holidays so, no need to rush.

Arriving in Kiel, embarkation runs smoothly and as the cruise team was so fascinated by the

Lady 2CV, she gets a particular place on the parking area. The ferry ride was calm, we slept well

and enjoyed a nice Scandinavian breakfast before disembarkation. I'm excited about what is expecting us in the coming days. I've

21 hp
mountains
and 3.000km

been once in Norway but at that time, I drove with the Jeep.

So, the drive was quite easy going whereas this time with the 2CV, it's another cup of tea! The first slope is being done in the third gear, at 60km/h with a motor causing as much noise as a tractor. Two more tunnels to go with a slope of 7% and we would have managed our first 8 km! Few meters ahead, I have to shift from the 3rd to the 2nd gear with a speed of 30km/h. Wow, I better not imagine the next 2000 km ahead of us.

I will not give you a report of our journey but only a last thing, I would like to tell you:

That was the best trip we had so far. The Lady in red brought us everywhere we wanted to, we were cordially received at the hotels with a friendly service.

The people were warm-hearted and were all amazed by the Deux Chevaux. The construction workers waved cheerfully giving us the impression as if they saw such a spectacular vehicle in a street parade. We drove through the Arctic at 20 degrees above zero, though the whole landscape was covered with snow. The sun was shining mostly everyday permitting us to even drive with an opened roof. The more we get in the north, the brighter the 2CV was shining like a ruby in the middle of the white lush scenery. Later on, we could admire the vast and magnificent landscape from the vessel on the way back to Bergen while the Lady was recovering herself from the drive, parked between a Porsche and a Range Rover. The mountains, the Fjords, the slopes, the fascinating people, the drive itself with the Lady, the great food, the unique scenery, the waterfalls, this solitude and tranquility, the instant sense of well-being, all these experiences remind us how precious life is and that we shall enjoy life to the fullest.

The voyage was much relaxed while doing it with a vintage vehicle and of course using the good old atlas map.

"Don't wait for the perfect moment, take the moment and make it perfect." (Zoey Seward)

Go for it, guys!

Yours, Ansgar and Stephanie Olberding

GENERAL SALES TERMS AND CONDITIONS Der Franzose Automobiltechnik GmbH (below „seller“ mentioned“)

§ 1 General – Scope of application

(1) Our Sales Terms and Conditions shall apply in any case. Other Sales Terms and Conditions shall not apply, unless expressly agreed in writing. Our Sales Terms and Conditions shall also apply even if we know that the Buyer's conditions are differing from our General Sales Terms and Conditions. <https://www.franzose.de/en/CMS/AGB/>

(2) For traders, for legal persons of public law or public-law special property as defined under § 310 paragraph 1. BGB our Sales Terms and Conditions shall also unrestricted apply.

§ 2 Offer and contract conclusion

(2.1) Online orders

(2.1.1) The product description in the seller's online shop do not constitute any firm offer from the Seller but merely enables the Buyer to submit a binding submission.

(2.2) The Buyer may submit a submission using the online-shop order form. In this case the customer submits a firm submission to the Seller by clicking the button „order“ after filling in his shopping cart. The transmission of the submission by the Buyer is also possible by postal service, e-mail, fax or phone.

(2.3) The seller may accept customer's proposal within five days:

- sending a written order confirmation to the Buyer by fax or e-mail. The access to the order confirmation is decisive.
- by delivering ordered products to the Buyer. The access to the delivery is decisive.
- requesting the Buyer to pay after ordering.

Provided that several of the aforementioned alternatives occur, the contract will be concluded as soon as one of the aforementioned alternatives firstly occurs. The non-acceptance of customer's submission by the Seller within the given deadline means the refusal of the submission and it releases the buyer of his statement of intent.

(2.4) The period of order acceptance shall start the day after Buyer's submission dispatch and shall end at the end of the fifth day following submission dispatch.

(2.5) The contract's content of the online order form will be recorded by the Seller and shall be sent to the Buyer in written form together with these General Sales Terms and Conditions (for example via e-mail, fax or letter) after the receipt of Buyer's order submission. In addition contract's content will be recorded on the Seller's website. Data record is accessible for the Buyer via the password protected customer account under the condition that he has created a customer account before submitting his order.

(2.6) The Buyer has the opportunity to correct the entered data prior to firm submission transmission via keyboard and mouse function. Beyond prior to submission transmission the entered data will be displayed in a confirmation screen window and can be corrected as well via keyboard and mouse function.

(2.7) English only is contractual language.

(2.8) Order processing and contacting usually take place via e-mail and automated order processing. The customer has to ensure that the email-address he provides during order process is accurate in order to receive e-mails sent to him by the Seller.

Particularly, the Buyer has to ensure that e-mails sent by the Seller or a by third party can be delivered even in case of active SPAM filters.

(3) Orders

(3.1) If the submission is in accordance with § 145 BGB it can be confirmed by us within 2 weeks. The acceptance can also occur via spoken or written declaration, by order confirmation in written form, or order confirmation in text form (email, fax) or by the delivery of the goods.

§ 3 Right of withdrawal

Traders, legal persons of public law and special property as defined under § 310 paragraph 1. BGB have no right of withdrawal.

§ 4 Prices – Terms of payment

(1) Our prices are always ex-work prices exclusive shipping cost and packing charges which are separately shown on the invoice if no special conditions are mentioned on the order confirmation. Shipping cost are invoiced according to the effective „shipping-index. In case of duties and taxes it shall be separately invoiced to the Buyer by the forwarder (for instance DHL).

(2) Our prices include VAT which is invoiced at the official rate of date of invoice and shown separately on the invoice.

Our prices for non-european customers are exclusive VAT as soon as the Buyer communicates his non-euro-

pean address. If the non-european Buyer picks up the goods at Seller's head office he will have to pay the effective VAT. The paid VAT will not be refunded by the Seller even not after the exportation to the non european country.

(3) Discount may not be deducted without previous written agreement.

(4) If no special term of payment is mentioned in the order confirmation the total amount has to be paid without deduction within 10 days after date of invoice. Regarding overdue payment legal provisions shall apply.

§ 5 - Place of jurisdiction - Place of execution

(1) If the Buyer is trader the place of jurisdiction is our place of business; but we are also authorized to take him to the court of his place of residence.

(2) German legislation shall be applied; the application of UN-Sales Convention is excluded.

(3) Except contrary mention on the order confirmation our place of business is place of execution.

§ 5 Set-off interdiction – Right of retention

Set-off is only allowed to the Buyer if his counterclaims are legally stated, uncontested and approved by us. Furthermore the Buyer is allowed to apply his right of retention if his counterclaim is based on the same contract relation.

§ 6 Delivery time – Responsibility in case of delivery delay

(1) The beginning of the delivery time which we confirmed implies that all possible technical questions have been cleared.

(2) The compliance of our delivery obligation implies the accurate implementation of Buyer's obligations in due time. We reserve ourselves the right of objection for non-complined contract.

(3) In case of default of acceptance or non-implementation of any obligation by the Buyer, we are authorized to claim a compensation for the caused damages and for the possible additional expenditures. All rights for further pretensions reserved.

(4) Provided that the conditions written in § 3 are existent, the risk of a casual damage or the risk of a casual deterioration of object of purchase is carried by the Buyer as soon as the payment or the acceptance of the delivery has been delayed.

(5) We are responsible under legal provisions as far as the fundamental contract is a time deal. We are also responsible under legal provisions if the Buyer, following to a delayed delivery due to the Seller, declares that he is no more interested in further fulfillment of contract.

(6) We are also responsible under legal provisions as far as the delivery delay is due to intentional or grossly negligent breach of one of our obligations; we also responsible under legal provisions for the possible negligence of our representatives or auxiliary persons. As far as the delivery delay is not due to an intentional or grossly negligent breach of contract from our side our responsibility for damage indemnity is strictly limited to the foreseeable and concrete damage.

(7) We are responsible under legal provisions as far as the delivery delay is due to our intentional or non-negligent breach of contract; in such a case our responsibility for damage indemnity is strictly limited to the foreseeable and concrete damage.

(8) Furthermore if we are responsible for delivery delay we compensate for every complete week 3 % of value of goods, maximum 15 % of value of goods, according to a standard delivery delay all-in indemnity.

(9) All rights for further pretensions reserved.

§ 7 Collection by the customer

As far as a collection of the goods by the Buyer has been agreed no shipping cost will be invoiced. The Buyer has to collect the goods at the buyer's place of business after arrangement. The Seller has to inform the Buyer by Email that the goods can be collected.

§ 8 Transfer of risk - Packing charges

(1) Our prices are always ex-work prices if no special conditions are mentioned on the order confirmation.

(2) Packaging will not be withdrawn except pallets. The Buyer has to dispose of packages at his own's expense.

(3) Deliveries are always insured. Corresponding cost are borne by the Buyer.

§ 9 Warranty for defects – Limitation of liability in time

(1) Warranty claims from the Buyer implies that he duly complied with his obligation of investigation and reproval (§ 377 HGB)

(2) Warranty claims prescribe 12 months after the date

of delivery to the Buyer's. In case of claim for compensation following to intentional or non-negligent damage of the user or in case injury to life, bodily injury or injury to health, legal provisions shall be applied.

(3) If the object of purchase shows a defect that already existed at the time of transfer of risk, despite all dedicated carefulness, subject to claim in due time, we shall either correct or replace the concerned product. The time limit for correction given to us should be appropriate (at least 2 weeks). Right of recourse will not be affected by above mentioned rule.

(4) If supplementary performance fails the Buyer may withdraw from the contract or reduce his pay, regardless of possible damage compensation pretensions.

(5) Damage compensation pretensions are not receivable in case of insignificantly deviations from the agreed configuration, from usability, or in case of natural abrasion or wastage, or defective fitting and also in case of damages occurring after the transfer of risk and due to wrong or negligent handling, or excessive strain, unsuitable utilities or defective fitting. In case of improperly repair work or modifications made by the Buyer or by a third party damage compensation pretensions are excluded as per for the outcome of these acts.

(6) Claims from the Buyer regarding the necessary charges for correction, in particular transportation charges, travel charges, labour costs and material cost are excluded. If the product delivered by us has been retroactively brought to another place than the Buyer's place of business, except the movement is due to the conventional usage of the product.

(7) The Buyer's right of recourse against us only exists if the Buyer has not concluded with his consumer any agreement about exceeding the legal provisions of warranty claims. Regarding the range of buyer's right of recourse, § 6 shall apply.

§ 10 Used parts and NOS parts – Responsibility

Defect liability for traders.

(1) For used parts defect liability is limited to one year. After one year any claim will be rejected. Deceit and fraudulent claims or defects or pretensions regarding defect liability assumed by us for one product are excluded from this rule.

(2) For used parts liability is limited to one year. After one year any claim will be rejected. For reconditioned parts liability is limited to one year. After one year an claim will be rejected. Reconditioned parts are used parts which have been optically and technically worked off or repaired.

§ 11 Joint liability

(1) A larger compensation responsibility as per § 9 and § 10 without consideration of the legal nature of claim is excluded. This particularly applies to claims based on fault at contract conclusion, following to any violation of obligations or any culpable damage compensation claim under § 823 BGB.

(2) The exclusion or restriction of our responsibility shall apply to our employees, workers, collaborators, representatives and auxiliary employees as far as their personal responsibility is concerned.

§ 12 Title retention

(1) We reserve ourselves the right of retention for the object of purchase till all payments for contract are received.

In case of contract violation by the Buyer, particularly in case of overdue payment we are authorized to take the object of purchase back. Withdrawal does not mean contract cancellation. Except explicit declaration in written form. The seizure of the object of purchase always means our withdrawal from the contract. After the seizure we are authorized to sell the object of purchase. The commercial benefit less commercial costs should be deducted from the amount of Buyer's commitment.

(2) The Buyer is obliged to care for the object of purchase; particularly he is obliged to ensure the contractual object at its original value against damage by fire, water and theft at his own expense. If any maintenance or service work is necessary the buyer has to perform it at his own expense.

(3) In case of distraint or any intervention by a third party the Buyer must inform us immediately so that we can take legal action under § 771 ZPO. If the third party is not able to refund court and extrajudicial costs as per § 771 ZPO the Buyer will assume the caused loss.

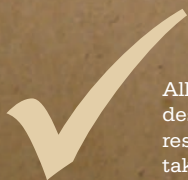

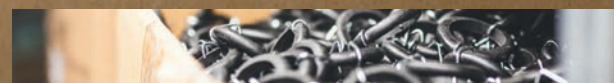

§ 13 - Place of jurisdiction - Place of execution

(1) If the Buyer is trader the place of jurisdiction is our place of business; but we are also authorized to take him to the court of his place of residence.

(2) German legislation shall be applied; the application of UN-Sales Convention is excluded.

(3) Except contrary mention on the order confirmation our place of business is place of execution.
