Some were worried that we might become adult with the time - Rest assured - we'll stay like we were!

End of November 2022. Since few days, it is an amazing winterwonderland in the north of Germany. It is pretty cold, even in the middle of the day, temperature remains under 0 degree. Thereby, it is sunny and no cloud darkening, neither the sky nor the state of mind. That's the perfect weather condition to check the heating capacity of the 2CV and also to test if an integrated winter protection does make a difference or not!
After few kilometers of drive, I decided to put on the winter protection – one gets older and thus much sensitive! I can fi nally enjoy this cozy, unhurried pace of the 2CV, remin-ding me of the early days, over 35 years ago, while I was still a young guy and had my first 2CV. It was a cheap one, mostly in a very bad condition at that time, but it was my freedom, the contrast to those conventio-nal Mercedes, Opel or Ford, which were very common here in the region. And, very important, it was my taxi to the night club, bars, girlfriend's place.
I did my apprenticeship as a car mechanic at Mercedes and I was not even allowed to park the 2CV on the premises. At work, I had to wear a cap, because of my massive, upswept hairstyle with coloured black hair. All my friends drove old French vehicles or also some Mercedes funeral cars. This was the expression for rebellion against the traditional 1980's. Thus, a wonderful idea came into my mind. I decided to establish my own company, handling with spare parts for the 2CV, together with my former girlfriend.
One can surely earn his living like this! We were young, dynamic and fully enthusiasts, though unexperienced but wanted to do whatever we like to.
Well, it's been now 35 years ago! Full of enthusiasm and motivation, we started our little business in our fl at, situated on the farmyard. It was a great feeling as far as busi-ness was running pretty good; however not for a long time! The friends switched from old to modern vehicles, built a house and became parents. And we? We were still driving our 2CV or an old Peugeot and Alfa. No house, no child, no money. Though working 65 hrs per week and a bunch of trouble.
„Falling down is part of life. Getting back up is living!“ We have chosen to stand up and go ahead. Today, business is running good and it's a pleasure working with the nice people here. Surely, there are moments, where one is slightly annoyed, but at the end of the day, we all laugh together and that's what matters. Maybe the school times in the 80's, the fact of being different, being rebellious, helped me facing particular circumstances in life and facilitated things as, one takes things easier and much relaxed. Nowadays, I take my time, driving the 2CV (ok, there are indeed, amongst others, DS, R4 or Peugeot and Alfa also on the waiting list). Moreover, I avoid as far as possible, all those digital technology and doing things for which I'm really interested in.
Back to the present times: In my memory, the heater of the 2CV was more efficient.
It's pretty cold here. Or am I really too old? I therefore decided to drive back to the garage, while listening to „The Cure“. What a nice evening, though a bit cold.
Thanks to many people, I have been able to experience many situations, permitting me narrating today. That is also the positive aspect of getting old; the high esteem does not only rise, but one is also keen to express it in words.
I'd also like to express my sincere thanks to my employees, as without their involved coorperation,

this would not have been possible. A big thank goes to my former girlfriend, actually my beloved wife, who allowed me doing what I wanted to. I thank her also for her precious advice, support and also for slowing me down occasionally, when necessary. And last but not least, I thank my parents for having letting me doing what I assumed being necessary to be done.
Even though, it sounds like blowing my own trumpet, I'm proud of myself and my achievements. I'm glad that I have managed doing things according to my philosophy to life, without being conquered by all those obli-gations or digital world. Things can remain thus.

Let's look ahead all together, what is expecting us in the next 35 years.

DOWN UNDER MELBOURNE

Greetings Kai ,
hope you are keeping well. Here in OZ I have reached a major milestone with my Citroën-DS project and wanted to pass on my thanks for all the help you and Der Franzose have given me to reach this point..
Not sure if I have mentioned this before but in early 2021 i took on a project,you might say something to keep me occupied during what here in Melbourne became the world's longest strict Covid lock-up some 240 days..... ....to restore this 1974 DS23 Pallas.
As for the back story, I was asked if I could help out a "nice gentleman/car guy to clean out his garage"...who as it turns out ,together with a high end restoration shop had totally dismantled a driving DS with the objective to restore it ...however the project was left abandoned for 16years. All door skins had been removed and the engine transmission out on a pallet, this car was in bits!
Not sure what I was thinking but I collected the items in a truck and a few weeks later the chassis.
Back to today, after approx 1100hrs and $$$ which included a total engine rebuild, piston sleeves, head,crankshaft chains etc.on Friday the DS 23 Pallas IE passed a strict roadworthy certificate and is now a registered road legal vehicle.
There are still a few items on my list, Pallas hubcaps,roof trim pieces.
Kai, again many thanks for all your help and I have informed the local Citroënistas of Der Franzose excellent service.
Keep safe and very best regards to you and the Team at Der Frans.

Le ~~chasseur~~ méc

Everyone knows the catalogue Manufrance, we all have relatives, who leafed through it or were even regular customers of Manufrance.
The history of Manufrance is long: it was founded around 1895 and for almost 100 years, their sales catalogue was a kind of Bible of commerce in various households. Madam could find the latest pots and pans for her kitchen, while Monsieur was passionate about the technology, the tools, fittings and the two-wheelers: bicycles and motorbikes, own brand named Hirondelle. In 1936, with the Front Populaire (Popular Front), paid holidays for employees were introduced and since then, various camping items were also o˝ered in the catalogue Manufrance. In peacetime, one could even find articles for leisure activities, such as weapons for hunting, bird whistles and fishing rods. Beside this catalogue, Manufrance published the magazine „Le chasseur français“. Since the First World War, this monthly magazine has been bought, not only because of those fascinating items for partridge hunting, but also because of the personalized ads.

canicien français

It is estimated that a˛er 1918, about one hundred thousand war-widows found love again thanks to „Le chasseur Français“.
When Christian, a client from South of France told me that the CiPeRe catalogue had somewhat the same value as the Manufrance catalogue for him as well as the club mates, you can imagine how flattered I was! Being compared to Manufrance is like being figuratively put on the top of the ladder, not far from the Bible! Perhaps, we should consider publishing a magazine „ads for lonely hearts! Got a title in mind; „Le mecanicien français“. Sounds good, doesn't it?
Back to the catalogue , Manufrance was known for its diversity, but also for, what is o˛en missing in the virtual world: TRUST. Even in the seventies when Manufrance seemed „old-fashioned“, the customer was hardly ever disappointed. The customers had almost unlimited confidence in the quality of the products. The only competitors who o´ered the same products, were the hawkers, especially in rural areas. At that time, there were still many traders traveling from place to place, selling their goods whatever the quality, from good to very poor. A great-granduncle of mine was specialized in lamps in shape of dolls - there's no accounting for taste. He sold them in the villages on small markets. I know a street vendor, who was selling anvils, imported from Spain. He went from door to door - a very tough job.
It was not uncommon for these vendors to have a very miserable reputation, whereas Manufrance was extremely trustworthy. Our goal at Der Franzose/CiPeRe is to never disappoint you. We are doing our best, allowing you keeping your classic car running while providing you with articles of good quality. Day a˛er day, for actually 34 years, we have been looking for manufacturers, who produce spare parts for your vehicles. From the smallest screw to the whole body, we want to have the possibility o´ering you everything that Citroën, Peugeot and Renault no longer supply, but which is essential for maintaining your car. You will quickly realize the diversity of the parts when browsing the catalogues of CiPeRe/Der Franzose.
As conclusion, I'd like to seize this opportunity of this new catalogue to thank Christian from the bottom of my heart, telling me that our catalogues are comparable to Manufrance, is a huge honour.
And last but not least, thank you, our trustworthy customers. The trust you have in us, is a particular motivation for our daily work.

Oh, là là!!
What a crazy time! The things of the old days are more or less worthless today. And I won't go into details regarding the crisis we are all experiencing, you know them as well as I do.
There is one thing that a˝ects us directly in the world of classic cars. Many of the major historical spare parts manufacturers have removed various products for the maintenance and repair of our cars from their catalogues. Following an implacable economic logic, the decision-makers of the large groups have chosen to stop manufacturing certain parts whose sales quantities were too low.
We have been able to replace certain products with equivalent products o˝ered by small and medium-sized European companies outside the large groups. The most important thing for us is to preserve a high availability and quality of the parts, though increase of the price.
In addition to this, the transition to plug-in cars is pushing some companies to renew their production. And finally, other companies are leaving the automotive sector and moving into completely di˝erent sectors.
To be concrete, let's look at the particular case of exhaust manufacturers. Which industrial entrepreneur will choose to invest in the development and production of exhaust systems today? Electric cars will not need them. The same applies for cooling radiators, water pumps and the hoses that go with them. It goes on with clutches, gearboxes, engine parts, liners, pistons, head gaskets, spark plugs and the list is long enough.... Due to lack of investment, some companies are closing down. And a ˛er a closure, we can no longer get spare parts for our cars.
At Der Franzose, we have decided to increase our storage capacity to get ready for the worst. It is important to us that we can always deliver to our customers and thus enable them to drive in the old days. The large stocks of parts give us some time to look for an alternative each time a manufacturer quit business. This year, we have been able to increase our stock again and actually, we have more than 2.5 million parts in our warehouse. **The quantities in stock are displayed in real time on our website!**
The increase in costs is reflected in the prices, as the margin on the sale of spare parts is low. If dealing with jeans with a margin of between 400 and 600%, we would be able to endure this. But in our business, the margins are much lower, not to mention the increased costs of transport and storage.
In addition, we also retransmit any price improvements when the purchase price has been decreased.
The current catalogue shows the prices valid in December 2022. Prices may vary and the current price for your purchases is the one displayed online on our website. Unfortunately, we have to give up the idea of publishing a price valid for a whole year, which we have been doing for 35 years.
So enough of the unpleasant things. Thanks to the loyalty of our customers, their kindness and understanding help us enormously and make it easier for us to look to the future. We would like to thank you from the bottom of our hearts. It means a lot to us. Things will also get better and tomorrow the sun will rise again. As far as I am concerned, I'm going on a drive in my 2CV and maybe I'll stop by a nice café.
And next week I'll get to try out so-called climate-neutral e-fuels. I'm looking forward to that (because green e-fuels remove as much CO2 from the atmosphere during production as they subsequently release when burned). Good news for the future!

Oil - Now, it's gonna be greasily complicated...

Most people think that oil change is very simple - buying the oil at the filling station and fill it??

It sounds very easy but for vintage vehicles, the modern oil is not really the optimal one for the motor. The new modern oil are thin fluid and contain much more cleaning additives which can ruin your motor.

Nowadays, the interval of oil change in modern cars with 50,000 km, is not an unusual condition. The modern oil has to be very thin to avoid that the filtration run smoothly, preventing sludge deposits and suits also vehicles with short distances. Whereas for vintage cars, oil change is done most of the time at specific season of the year! Oil is being renewed few weeks before the „hibernation"!

Vehicles like H-Van, Traction Avant, 2CV (until 2CV4) as well as many other vintage cars do not even have an oil filter. The impurities are set down in the oil pan and is being flushed out at the next oil change. That's exactly how it shall work! With the modern oil, it is the contrary which happens. The oil dissolved the impurities and pumped it again in the oil circulation. And this is wrong! Moreover, the material of the motor gasket of our vintage does not tolerate the chemical additives in the modern oil. Oil seals and rubber seal get harder through the additives and do not seal up correctly. Cork seal get eroded and does not absorb any oil anymore and thus the motor leaks.

Just imagine, you take a plate full of noodle. On the lower part of the plate, you have 3 holes, pour some good olive oil upon the noodle. You can see how the noodle absorb that oil and underneath the plate, there is no trace of oil.

Now pour some soft drinks on the noodle. A pure chemical drink... now you can see that the soft drink does not get stick to the noodle and even wash out the good oil and the whole fluid are to be found on the plate and drop out slowly through the small holes in the plate!

Dear friends of vintage cars, this example with the noodle and the oil, is in fact a figurative one showing you what happens with your motor when you are using the modern high-tech synthetic oil.

So please hands off from all those modern synthetic oil.

Last but not least - our tip: the optimal oil for Citroen 2CV, DS, Traction und H-Van is 20W50. Even Renault R4, R5, R16, all rear-mounted engines (except Alpine) and all Peugeot like 203, 404, 204, 304, 404 und 504 are „grateful" if the motor is being filled with 20W50!

Different prices in the delivery countries - Why?

From now on, end customers will be charged the VAT rate, according to the country chosen for the delivery. From 01.07.2021, a new Europe-wide regulation for online sellers will come into force, ensuring a fairer distribution of VAT revenues in the EU countries. (One-Stop-Shop proceedings) From now on, end customers will be charged the VAT rate, according to the country chosen for the delivery. (B2C - Business-to-Consumer) We then retransmit this tax, one-to-one, to this country as well. This means that the sales tax is always credited to the country, in which the goods are dispatched to.

This change can lead to different end consumer prices, as the price calculation is always based on the net price + VAT tax (rate of the country of delivery). The prices in this catalogue are calculated with 21% VAT. If the invoice and the delivery address is in a not EU-country we exclude the tax. Taxation and customs duties: For deliveries to the non-EU as well as non-Schengen countries, additional cost in regard to customs, fees and taxes will arise.

Delivery country Germany 100€ (net Total) + 19% VAT = 119€ (Gross/end consumer price)
Delivery country Sweden 100€ (net Total) + 25% VAT = 125€ (Gross/end consumer price)
Delivery country Ireland 100€ (net Total) + 23% VAT = 123€ (Gross/end consumer price)

Used part deposit, what's that?
A lot of spare parts are no longer completely new fabricated. So special companies take back used parts to disassemble them. This single parts are going to be cleaned and lacquered , all flexible parts and pistons going to be renewed. After assemble them again, the parts are as good as new again. However, we don't have so much used parts as we need and that is why we work with "used part deposit". For example: A distributor sends us a renewed brake calliper. Excepting the base price, we have to pay 50 €uro used part deposit for this part.
If we send back a suitable brake calliper, the distributor repays the 50 €uro.
We are also using this method: If you buy a spare part which is afflicted with used part deposit, you have to pay the selling price and the deposit. By sending back the replaced old part, you'll get back the deposit (just if the old part is qualified for an overhauling).

LHS substitute hydraulic fluid RR363. 1 liter. This hydraulic fluid was provided in earlier days to Rolls-Royce and Bentley by the original supplier Castrol. The Castrol hydraulic fluid has also been approved for Citroën DS vehicle with the LHS system. As Castrol stopped the production since 2018, all rights of production have been taken over by a company in England. We recommend to empty the whole hydraulic LHS DS and proceed with a refilling of the hydraulic system. Our experience with the RR363 is excellent.

Ethanolfuel

new technology, new problem!

We are all delighted with the new achievements via the modern technology. However with the introduction of the E10 blend, much more trouble are being caused. The bio-ethanol fuel mixture is a highly concentrated dissolver which might cause some leackage issues to your engine, specially the seals and the fuel pipes. The ethanol causes serious corrosion. Moreover, recent engines have a sealed fuel system in contrast to vintage cars which have a good bleeding fuel system. This additional corrosion arises in the bleeding fuel system as ethanol is hygroscopic i.e it attracts moisture particles from the air. Simultaneously, this trouble is intensified through the acetic and formic acid which are being emerged by ageing fuel, specially for long service life vehicles.

Before the introduction of the catalyst, the additives in particular phosphate avoid causing corrosion.However as the phosphate also damaged the pollutant filter, this has thus been replaced by other resources. Nevertheless, through the continuing development in the automotive industry, those additives are no more to be found in fuel. Unleaded fuel from the 90s contained much more anticorrosive coating as fuel from nowadays.

Through the oxygen influence, E5 and E10 fuel are no more stable and decompose after few months. The stabilized additives are then inefficient. Many manufacturers can no more guarantee a durability of 60 days. After this period, the fuel starts to decompose and has a bad smell.

We then have to handle this corrosion issue ourselves. But how shall we manage it, when ethanol is being included everywhere?

The best solution to avoid further corrosion is to keep the tank full. After a long winter break, it is important to empty the tank as well as the fuel pump and the carburetor. Please do yourself a favour, use only fuel without bio-ethanol.

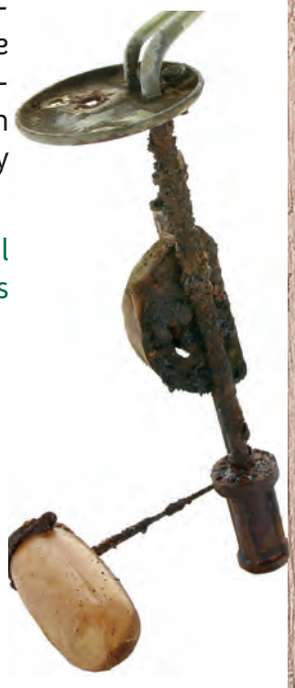

Based on our knowledge, only Aral (Ultimate), Shell (V-Power) and TOTAL (Excellium) can guarantee that those fuel are not being mixed with (bio-)eethanol.

Since five years, we are ourselves experimenting with the Liqui Molly petrol-stabilisator which is ideal for vehicles with low annual mileage and which can also be used after a winter break. When immobilizing your vehicle, please fill in the required petrol-stabilisator quantity into the fuel tank and let the engine run during 10 minutes. We only get good feedback about that indeed without guarantee. Anyway, we can only recommend it to you.

A helpful hint for you guys: we also use the good petrol for our own engines which we rarely used, like lawnmowers, chain saw, tractor etc... and amazingly, we can start the engine immediately even after a long winter break!

No need to save for a full tank to get higher expenses later on!

result, after 3 years using fuel with ethanol

Electronic ignition system. Suitable for Citroën SM. The ignition system has been completely redeveloped in 2021, and contains a completely new software in addition to the proven hardware. It is therefore completely compatible with the odd ignition sequence of the Citroën SM. The ignition distributor has received a ball bearing to reduce heat production and have an even more accurate guidance. Other special features: Signal output that imitates the signal of a dual ignition coil. So there is no need to modify the original r.p.m counter. Also the D-Jetronic injection is supported. The ignition system is supplied including a new high performance ignition coil. Finally a perfect solution for the Citroën SM.

WHY CHOOSE ELF HTX CLASSIC CAR OIL?

TOTAL/elf has been the original equipment supplier for Citroën, Peugeot and Renault for more than 50 years. To protect automotive classics from damage caused by the use of modern oils, ELF has developed the HTX series. The unique HTX technology gives this engine oil optimum corrosion protection. In addition, the very good adhesion of the oil leads to a low-wear engine start even after longer downtimes. The ELF-HTX oils are compatible with standard and vintage car fuels as well as synthetic and non-synthetic oils.

Regarding rear suspension cylinder sleeve

We, relatively often receive complaints about the rear spring cylinder sleeves. Because of such discrepancies, We would like to give you a little clarification about these sleeves.
Function: This sleeve captures the hydraulic oil (LHM + LHS) coming from the rear suspension cylinder. The oil is then sent back to the hydraulic circuit via a small return hose. Besides, this sleeve must be flexible enough to follow all spring movements of the vehicle. Therefore, there is a high mechanical load acting on this sleeve.

The original sleeve had a lot of softeners in their rubber, which are not allowed in the European Union anymore.
So, a material had to be found that is resistant to LHM and LHS hydraulic fluid.
A solution has been indeed found and has also relatively good mechanical abrasion resistance as well.
Yet, the sleeve is not resistant to all kind of modern chemicals (wasn‘t neither in the past).

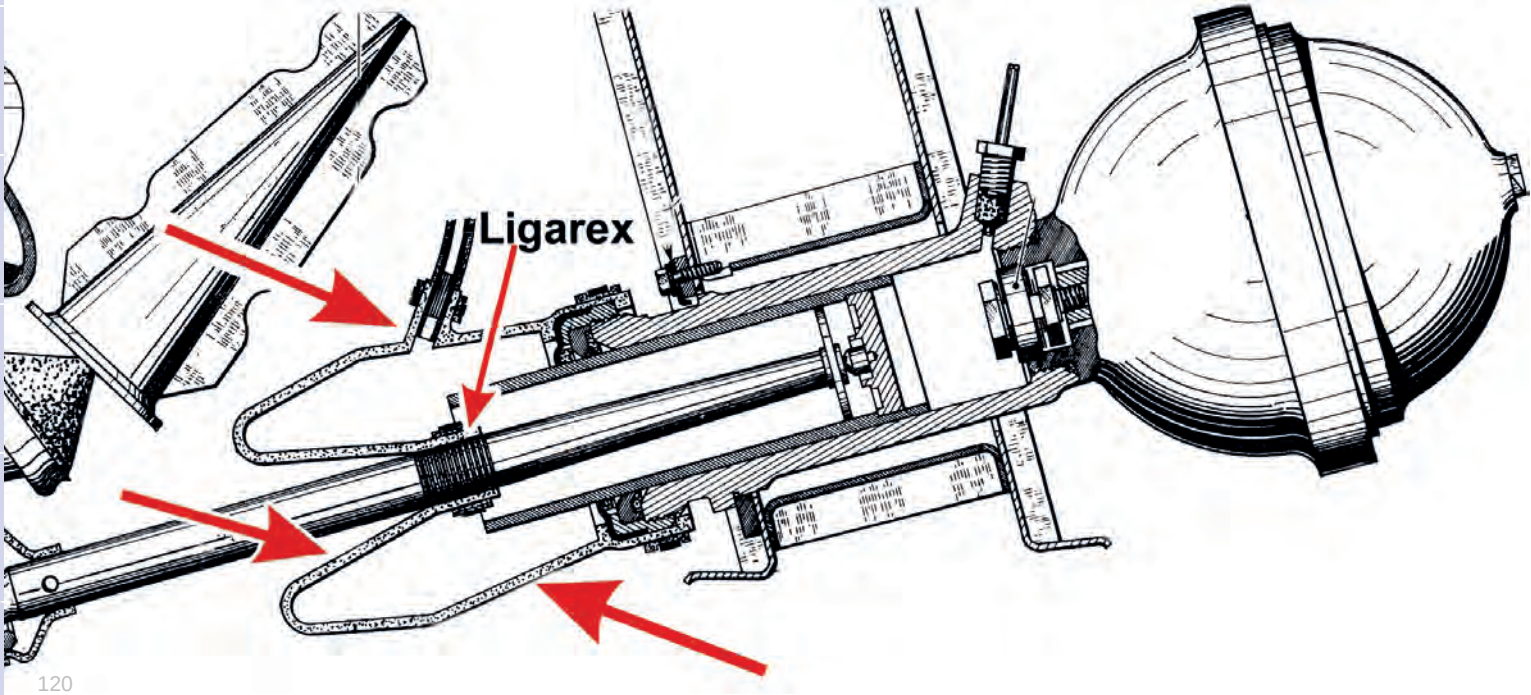

Nevertheless, we still got bad feedback from customers. So, we asked the customers complaining about the sleeve, to bring their DS to our premises (upon opportunity) and allow us inspecting their vehicle briefly. In almost all cases, we noticed the following:
The sleeves have been mounted incorrectly or fastened with the wrong clamps.

Unfortunately, in most cases, the sleeve is often fixed with cable ties or hose clamps, but this will damage the sleeve from the inside due to the thick fastener. Upon each movement of the car, the constant frictions wear out the material. It is obviously an installation fault. Please refer to the original cross section from Citroën for a proper assembly.

It is also essential to ensure that the rubber stops of the swing arms, are in good condition. If a rubber is missing or if it is completely compressed, the sleeve can tear apart. When the DS is in the lowest position, the rod is pushed as far as the radius arm allows. If the rod is being pushed too wide apart, the rubber is stretched to the extreme and will tear on short or long term.

Another common troublemaker is also that the return line is slightly clogged (this is the small plastic line - Rilsan line)
which is mounted to the sleeve. Especially for vehicles over 50 years which suspension cylinder leak much more than in their younger years, the large amount of hydraulic oil can not be drained from the sleeve.
The sleeve bloats and sooner or later simply burst. This is also not a quality issue!

Moreover, some sleeves as well as the hydraulic pipes become porous due to some chemicals that have been applied, intentionally or not. So, please avoid letting them getting in contact with those chemicals, any coating with solvents, gloss sprays for rubber, brake or rims cleaner or high-pressure

cleaner and so forth.

Hands off all modern chemicals when you are working on rubber parts of the hydraulic system !!

And another big problem is the immobilisation time of the DS. Long-term shut downs are fatal for the sleeves. This has always been such.

But it hardly came to this in the former times, considering that the DS was a new car.

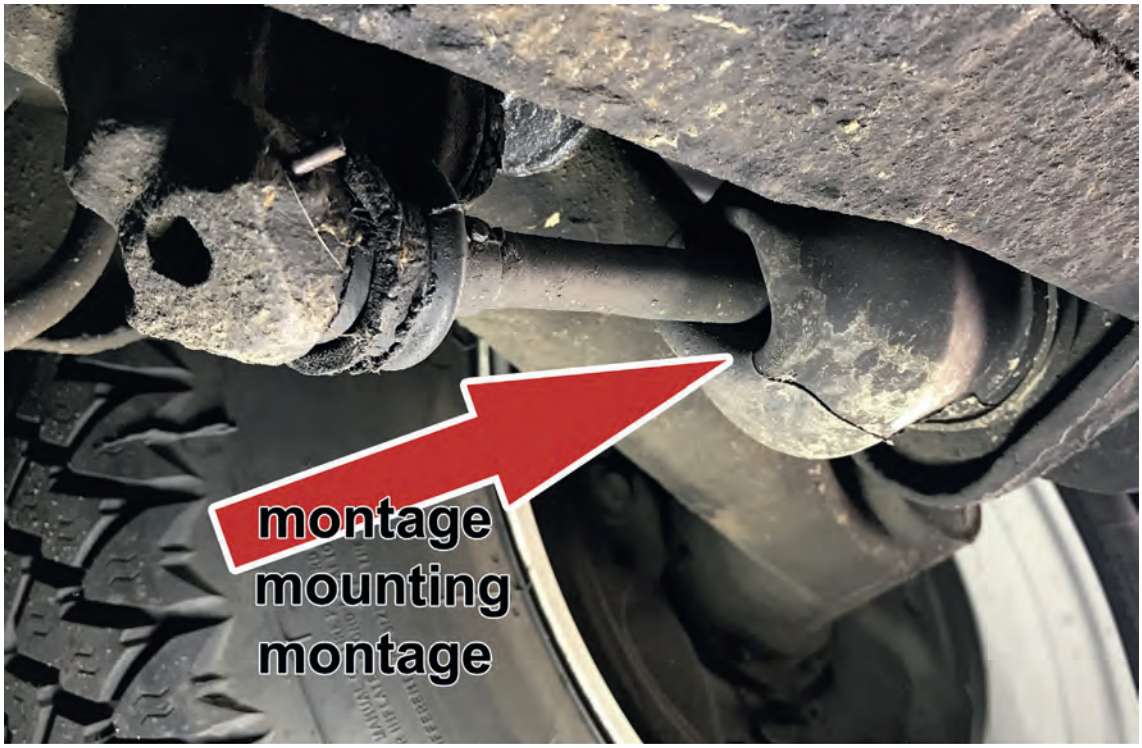

Explanation: A stationery DS is then at its lowest position. At the position, the rear spring cylinder sleeves are extremely tightened via the operating rod and the ball seat is stretched.
In addition to that, the sleeve will dry out from the inside when not in use and suddenly, at the next start the sleeve leaks as it is torn out. But once again, the sleeve is not faulty but a matter of a system conception which is not appropriate to an immobilisation.

There are several reasons why the sleeve is defective at an early stage. But actually, no need to blame the sleeve as other sources can be the reasons for this damage.Actually January in 2020, they are still absolutely leak-proof and not cracked. See photo. And whoever does not believe it, feel free to come over and have a look at my vehicle. I must admit that my DS is constantly on the road.

And when you fix something, it is very important to read a manual or repair guide first, until you know exactly all steps, even if it sounds simple.

A little story to conclude: One of our employees (over 15 years of service) did an inspection on our DS from 1965 and made a test drive (the car was standing in the shop for 5 years).
As I came through the shop, he had the bonnet opened and was busy controlling the electrical system.
I asked him „How was the drive?“.
He replied „Good, only the high beam does not work properly.“

I, simply opened the door and pulled the switch.. and here we are ...

Moral of the story: Always read the installation and operating instructions. If he had read it, he should be aware that the high beam can be switched on by a pull switch on the dashboard!
The DS was not faulty. Mistakes happen everywhere!

0812 insulating mats generally

Interior insulation mat (approx 10mm thick), self adhesive, optically as from the years 60s to approx. end of the 70s. Dimensions: approx. 115 x 55cm (about 600g/m²). These mats have the greenish colour of the original felt mats (made from recycled cotton fibres), but have been manufactured according to today's automotive technology. Flame retardant, no harmful vapours! Completely "Made in Germany". These mats were installed in firewalls, doors, side panels, boot. For the vehicle floor we recommend the mats with a heavy layer (bitumen-like). We have been looking for them for a long time, and finally found some!

Interior insulation mat for the floor (approx 15mm thick), optically as from the years 60s to approx. end of the 70s. Dimensions: approx. 115 x 55cm (approx. 3200g/m²). These mats have the greenish colour of the original felt mats (made from recycled cotton fibres), with an additional heavy layer (modern bitumen, does not age, does not crack, UV resistant, water repellent, state-of-the-art automotive technology, but with the look of the old days!) The insulation material is flame retardant, no harmful vapours! Completely "Made in Germany". These mats are laid on the vehicle floor or cardan tunnel. Heavy layer to the carpet side! The heavy layer also prevents "droning noises". The mats can be deformed by heat and adapt to the contours.

Tugalin is a high-performance glass cleaner with long-term effect. It effortlessly removes soot and nicotine residues, oil and grease films, grease, dust, fingerprints, insect stains and much more from glass and all smooth surfaces. The nanoparticles leave an invisible protective layer on the cleaned surfaces, which delays resoiling and makes the next cleaning easier. Tugalin is a very powerful glass cleaner whose easy handling and streak-free results quickly make it an indispensable aid in industry, commerce and the home. 1000ml spray bottle. Made in Germany

GENERAL SALES TERMS AND CONDITIONS
Der Franzose Automobiltechnik GmbH
(below „seller“ mentioned“)

§ 1 General – Scope of application

(1) Our Sales Terms and Conditons shall apply in any case. Other Sales Terms and Conditions shall not apply, unless expressly agreed in writing. Our Sales Terms and Conditions shall also apply even if we know that the Buyer´s conditions are differing from our General Sales Terms and Conditions. https://www.franzose.de/en/CMS/AGB/

(2) For traders, for legal persons of public law or public-law special property as defined under $ 310 paragraph 1. BGB our Sales Terms and Conditions shall also unrestricted apply.

§ 2 Offer and contract conlusion

(2.1) Online orders

(2.1.1) The product description in the seller´s online shop do not constitute any firm offer from the Seller but merely enables the Buyer to submit a binding submission.

2.2) The Buyer may submit a submission using the online-shop order form. In this case the customer submits a firm submission to the Seller by clicking the button „order“ after filling in his shopping cart. The transmission of the submission by the Buyer is also possible by postal service, e-mail, fax or phone.

2.3) The seller may accept customer´s proposal within five days:
- sending a written order confirmation to the Buyer by fax or e-mail. The access to the order confirmation is decisive.
- by delivering ordered products to the Buyer . The access to the delivery is decisive.
- requesting the Buyer to pay after ordering.

Provided that several of the aformentioned alternatives occur, the contract will be concluded as soon as one of the aformentioned alternatives firstly occurs. The non-acceptance of customer´s submission by the Seller within the given deadline means the refusal of the submission and it releases the buyer of his statement of intent.

2.4) The period of order acceptance shall start the day after Buyer´s submission dispatch and shall end at the end of the fifth day following submission dispatch.

2.5) The contract´s content of the online order form will be recorded by the Seller and shall be sent to the Buyer in written form together with these General Sales Terms and Conditions (for example via e-mail, fax or letter) after the receipt of Buyer´s order submission. In addition contract´s content will be recorded on the Seller´s website. Data record is accessible for the Buyer via the password protected customer account under the condition that he has created a customer account before submitting his order.

2.6) The Buyer has the opportunity to correct the entered data prior to firm submission transmission via keyboard and mouse function. Beyond prior to submission transmission the entered data will be displayed in a confirmation screen window and can be corrected as well via keyboard and mouse function.

2.7) English only is contractual language.

2.8) Order processing and contacting usually take place via e-mail and automated order processing. The customer has to ensure that the email-address he provides during order process is accurate in order to receive e-mails sent to him by the Seller.
Particularly, the Buyer has to ensure that e-mails sent by the Seller or a by third party can be delivered even in case of active SPAM filters.

(3) Orders

(3.1) If the submission is in accordance with § 145 BGB it can be confirmed by us within 2 weeks. The acceptation can also occur via spoken or written declaration, by order confirmation in written form, or order confirmation in text form (email, fax) or by the delivery of the goods.

§ 3 Right of withdrawal

Traders, legal persons of public law and special property as defined under § 310 paragraph 1. BGB have no right of withdrawal.

§ 4 Prices – Terms of payment

(1) Our prices are always ex-work prices exclusive shipping cost and packing charges which are separately shown on the invoice if no special conditions are mentioned on the order confirmation. Shipping cost are invoiced according to the effective „shipping-index. In case of duties and taxes it shall be separably invoiced to the Buyer by the forwarder (for instance DHL).

(2) Our prices include VAT which is invoiced at the official rate of date of invoice and shown separately on the invoice.

Our prices for non-european customers are exclusive VAT as soon as the Buyer communicates his non-european address. If the non-european Buyer picks up the goods at Seller´s head office he will have to pay the effective VAT. The paid VAT will not be refunded by the Seller even not after the exportation to the non european country.

(3) Discount may not be deducted without previous written agreement.

(4) If no special term of payment is mentioned in the order confirmation the total amount has to be paid without deduction within 10 days after date of invoice. Regarding overdue payment legal provisions shall apply.

§ 5 - Place of juruduction - Place of excution

(1) If the Buyer is trader the place of juridiction is our place of business; but we are also authorized to take him to the court of his place of residence.

(2) German legislation shall be applied; the application of UN-Sales Convention is excluded.

(3) Except contrary mention on the order confirmation our place of business is place of excution.

§ 5 Set-off interdiction – Right of retention

Set-off is only allowed to the Buyer if his counterclaims are legally stated, uncontested and approved by us. Furthermore the Buyer is allowed to apply his right of retention if his counterclaim is based on the same contract relation.

§ 6 Delivery time – Responsability in case of delivery delay

(1) The beginning of the delivery time which we confirmed implies that all possible
technical questions have been cleared.

(2) The compliance of our delivery obligation implies the accurate implementation of Buyer´s obligations in due time. We reserve ourself the right of objection for noncomplied contract.

(3) In case of default of acceptance or non-implementation of any obligation by the Buyer, we are authorized to claim a compensation for the caused damages and for the possible additional expenditures. All rights for further pretensions reserved.

(4) Provided that the conditions written in § 3 are existent, the risk of a casual damage or the risk of a casual deterioration of object of purchase is carried by the Buyer as soon as the payment or the acceptance of the delivery has been delayed.

(5) We are responsable under legal provisions as far as the fondamental contract is a time deal. We are also reponsable under legal provisions if the Buyer, following to a delayed delivery due to the Seller, declares that he is no more interested in further fufillment of contract.

(6) We are also responsable under legal provisions as far as the delivery delay is due to intentional or grossly negligent breach of one of our obligations; we also responsable under legal provisions for the possible negligence of our representatives or auxillary persons. As far as the delivery delay is not due to an intentional or grossly negligent breach of contract from our side our responsability for damage indemnity is stricly limited to the forseeable and concrete damage.

(7) We are responsable under legal provisions as far as the delivery delay is due to our intentional or non-negligent breach of contract ; in such a case our responsability for damage indemnity is strictly limited to the forseeable and concrete damage.

(8) Furthermore if we are responsable for delivery delay we compensate for every complete week 3 % of value of goods , maximum 15 % of value of goods, according to a standart delivery delay all-in indemnity .

(9) All rights for further pretensions reserved.

§ 7 Collection by the customer

As far as a collection of the goods by the Buyer has been agreed no shipping cost will be invoiced. The Buyer has to collect the goods at the buyer´s place of business after arrangement. The Seller has to inform the Buyer by Email that the goods can be collected.

§ 8 Transfer of risk - Packing charges

(1) Our prices are always ex-work prices if no special conditions are mentioned on the order confirmation.

(2) Packaging will not be withdrawn except pallets. The Buyer has to dispose of packages at his own´s expense.

(3) Deliveries are alway insured. Corresponding cost are borne by the Buyer.

§ 9 Warranty for defects – Limitation of liability in time

(1) Warranty claims from the Buyer implies that he duly complied with his obligation of investigation and reproval (§ 377 HGB)

(2) Warranty claims prescribe 12 months after the date of delivery to the Buyer´s. In case of claim for compensation following to intentional or non-negligent damage of the user or in case injury to life, bodily injury or injury to health, legal provisions shall be applied.

(3) If the object of purchase shows a defect that already existed at the time of tranfer of risk, despite all dedicated carefullness, subject to claim in due time, we shall either correct or replace the concerned product. The time limit for correction given to us should be appropriate (at least 2 weeks). Right of recourse will not be affected by above mentioned rule.

(4) If supplementary performance fails the Buyer may withdraw from the contract or reduce his pay, regardless of possible damage compensation pretensions.

(5) Damage compensation pretensions are not receivable in case of insignificantly deviations from the agreed configuration, from usability, or in case of natural abrasion or wastage, or defective fitting and also in case of damages occucring after the transfer of risk and due to wrong or negligent handling, or excessive strain, unsuitable utilities or defective fitting. In case of improperly repair work or modifications made by the Buyer or by a third party damage compensation pretensions are excluded as per for the outcome of these acts.

(6) Claims from the Buyer regarding the necessary charges for correction, in particular transportation charges, travel charges , labour costs and material cost are excluded. If the product delivered by us has been retroactively brought to another place than the Buyer´s place of business, except the movement is due to the conventional usage of the product.

(7) The Buyer´s right of recourse against us only exists if the Buyer has not concluded with his consumer any agreement about exceeding the legal provisions of warranty claims. Regarding the range of buyer´s right of recourse , § 6 shall apply.

§ 10 Used parts and NOS parts – Responsability

Defect liability for traders.
(1) For used parts defect liability is limited to one year. After one year any claim will be rejected. Deceit and fraudulent claims odr defects or pretensions ragarding defect liability assumed by us for one product are excluded from this rule.

(2) For used parts liability is limited to one year. After one year any claim will be rejected. For reconditioned parts liability is limited to one year. After one year an claim will be rejected. Reconditioned parts are used parts which have been optically and technically worked off or repaired.

§ 11 Joint liablity

(1) A larger compensation responsablity as per § 9 and § 10 without consideration of the legal nature of claim is excluded. This particularly applies to claims based on fault at contract conclusion, following to any violation of obligations or any culpable damage compensation claim under § 823 BGB.

(2) The exclusion or restriction of our responsabilty shall apply to our employees, workers, collaborators, representatives and auxillary employees as far as their personal responsability is concerned.

§ 12 Title retention

(1) We reserve ourselves the right of retention for the object of purchase till all payments for contract are received.

In case of contract violation by the Buyer, particulary in case of overdue payment we are authorized to take the object of purchase back. Withdrawal does not mean contract cancellation. Except explicit declaration in written form. The seizure of the object of purchase always means our withdrawal from the contract. After the seizure we are authorized to sell the object of purchase. The commercial benefit less commercial costs should be deducted from the amount of Buyer´s commitment.

(2) The Buyer is obliged to care for the object of purchase; particulary he is obliged to ensure the contractual object at its original value against damage by fire, water and theft at his own expense. If any maintenance or service work is necessary the buyer has to perform it at his own expense.

(3) In case of distraint or any intervention by a third party the Buyer must inform us immediatly so that we can take legal action under § 771 ZPO. If the third party is not able to refund court and extrajudicial costs as per § 771 ZPO the Buyer will assume the caused loss.

§ 13 - Place of juruduction - Place of excution

(1) If the Buyer is trader the place of juridiction is our place of business; but we are also authorized to take him to the court of his place of residence.

(2) German legislation shall be applied; the application of UN-Sales Convention is excluded.

(3) Except contrary mention on the order confirmation our place of business is place of excution.
